

SCOOTER

Lubricants Range

Rock Oil has many years experience supplying and supporting the scooter sector both in the UK and globally. Rock Oil has succeeded in developing a sophisticated range of products to include for the very latest 4 stroke machines requiring a low viscosity product. The scooter range caters for every scooter application to include all 2 & 4 stroke machines.

CITY 4 PLUS 5W-40

FULLY SYNTHETIC 4 STROKE

JASO MB • API SN

City 4 Plus 5W-40 plus gives you all the advantages of the latest 4 Stroke racing technology, in scooter lubrication. City 4 plus offers the ultimate power and protection to today's high performance 4 stroke scooters even under the most severe conditions. Developed to give rapid circulation at cold start and complete protection at high operating temperature for all high performance 4 stroke scooters.

PN 03084

CITY 4 PLUS 0W-30

FULLY SYNTHETIC 4 STROKE

API SN • ACEA A5/B5

City 4 Plus 0W-30 is an ultra modern fully synthetic 4 stroke scooter oil. It has been developed to provide rapid circulation at cold start and complete protection for frequent stop/start riding conditions in busy city traffic. It meets the very latest exhaust gas emission requirements and offers a real fuel saving benefit. Suitable for use in Piaggio scooters where 0W-30 is specified or any other scooter application requiring a 0w-30 fully synthetic lubricant.

CITY 2 PLUS

FULLY SYNTHETIC 2 STROKE

JASO FD • ISO-L-EGD

City 2 Plus gives you all the advantages of the latest 2 stroke racing technology in scooter lubrication. City 2 Plus offers the ultimate protection for today's high performance 2 stroke scooters even under the most severe conditions. The low ash formula offers major benefits including low smoke and high resistance to harmful pre-ignition, a severe problem in larger or more powerful scooters.

PN 07134

CITY 2

SEMI SYNTHETIC 2 STROKE

JASO FD • ISO-L-EGD

City 2 Scooter provides superb protection for all 2 stroke scooter engines. The advanced semisynthetic, low ash formulation results in super clean burning with minimum carbon build-up while releasing maximum power. Superior additives stop deposit build up and corrosion in the exhaust system caused by town riding.
