

MOTORCYCLE Support Lubricants Range

The **complete** solution for motorcycle support

Rock Oil has vast racing and motorsport experience enjoying many British & World Championship successes, ensuring that they are at the forefront of lubrication technology. The Motorcycle Ancillary range is designed to offer the complete range of maintenance and support products for both on and off road motorcycles. The range encompasses suspension, coolants and gear oils through to cleaners, chain lubricants and polishes. There's a product to cover all requirements.

GEAR PRO
75W

FULLY SYNTHETIC COMPETITION

Outstanding thermal and shear stability
• Superb wear protection • Significantly reduces friction, thus reducing power loss and improving gear changes • Smooth, precise clutch actuation and engagement.

PN 06841

SYNTHESIS
XRP GEARBOX

MAXIMUM PERFORMANCE RACING

Outstanding thermal and shear stability
• Superb wear protection • Significantly reduces friction, thus reducing power loss and improving gear changes • Passes crucial clutch friction test required to meet the JASO MA and MA2 specification, allowing safe, predictable performance in wet clutch applications

PN 03213

GRO

RACING GEARBOX

Designed to reduce friction and protect over a wide temperature range • Delivers maximum anti wear protection • Excellent thermal stability • Superior resistance to oxidation • Passes crucial clutch friction test required to meet the JASO MA2 specification, allowing safe, predictable use in wet clutch applications.

PN 06190

LITE
GEAR OIL

LIGHTWEIGHT GEARBOX

Designed to reduce friction and protect over a wide temperature range • Delivers maximum anti wear protection • Excellent thermal stability • Superior resistance to oxidation • Passes crucial clutch friction test required to meet the JASO MA2 specification, allowing safe, predictable use in wet clutch applications.

PN 02100

SYNTHESIS
SVI

SYNTHETIC SUSPENSION FLUIDS

Synthesis SVI fully synthetic suspension fluids are blended using technologically advanced synthetics together with the very latest additive technology to improve foaming tendencies and prolong seal life. They are stable under pressure and are compatible with air, nitrogen or argon charged suspension systems. Synthesis SVI fluids offer supreme anti-wear protection and a high resistance to water contamination and degradation. They offer the very highest levels of performance especially under extreme racing conditions.

Weights available:
• PN 05110: Synthesis SVI 2.5
• PN 05720: Synthesis SVI 3.5
• PN 05730: Synthesis SVI 5
• PN 05740: Synthesis SVI 6

SVI

SUSPENSION FLUIDS

SVI Suspension Fluids range are all fully compatible with each other and will mix with ease. Excellent anti-wear protection and a high resistance to water contamination and degradation. Excellent performance and longer service life, especially under extreme conditions of use such as racing.

Weights available:
• PN 05120: SVI 5
• PN 05130: SVI 7.5
• PN 05140: SVI 10
• PN 05150: SVI 15
• PN 05160: SVI 20
• PN 05084: SVI 30

RACING CASTOR

ENGINE OIL

Racing Castor is a traditional straight vegetable oil of SAE 40 viscosity for use either in 2 stroke or 4 stroke lubrication. It meets the continuing demand for a traditional castor lubricant, preferred in speedway, grass track and vintage machines. Racing Castor is suitable for all total loss and recirculating systems on four stroke engines, and for use as a pre-mix for 2 stroke engines with either petroleum or methanol fuel.

PN 14400

ICED KOOL

HIGH PERFORMANCE
ENGINE COOLANT

Iced Kool is a biodegradable, silicate and phosphate free high ultra high performance engine coolant. It reduces operating temperature and offers complete protection for the engine and cooling system. It is non-toxic, biodegradable and non harmful to the environment. Iced Kool prevents engine overheating even under arduous racing conditions, allowing continuous high power output and total reliability. It is premixed with de-ionized water ready for immediate fill.

PN 01830

KOOL-GUARD

MEG -38 | XL -38

PRE-MIXED ENGINE
COOLANT

Kool-Guard MEG-38 is an ethylene glycol-based engine coolant which employs Inorganic Acid Inhibitor Technology, including Silicates - suitable for use in many vehicles. Kool-Guard XL-38 is an ethylene glycol-based engine coolant which employs Organic Acid Inhibitor Technology. Suitable for use in all vehicles including those using Aluminium Alloy materials. Kool-Guard MEG-38 and Kool-Guard XL-38 are ready to use, and provide long lasting protection from -38°C to normal operating temperatures.

- PN 08650: KOOL-GUARD MEG-38
- PN 08670: KOOL-GUARD XL-38

DIRTBLASTER

HIGH PERFORMANCE
BIO CLEANER

Rock Oil Dirt Blaster is a unique motorsport biodegradable cleaner suitable for cleaning applications where the removal of dirt, sand, insects, oils and greases is required. It can be used on any hard surface and is safe to use on aluminium and paintwork. The unique scented formula offers the complete cleaning solution and can be used as part of a planned maintenance plan with other Rock Oil products. It is completely bio-degradable and non hazardous to the environment and may safely be disposed of to drain.

PN 00500

FACTORY FOAM

FOAM | ECO | KLEEN

Extensive testing in the harshest of conditions ranging from the desert dust to the cold wet bogs of Wales has meant that the Factory Foam range of filter cleaning products are the finest protection your engine can have against the ingress of airborne debris.

- PN 07060: FACTORY FOAM
- PN 07160: FACTORY ECO FOAM
- PN 00310: FACTORY FOAM KLEEN

HYDRAULIC BRAKE & CLUTCH FLUIDS

DOT 4 | DOT 5.1 | DOT 4 RACING

Rock Oil's range of high quality brake and clutch fluids are blended from superior materials to achieve a high standard of purity.

- PN 14420: DOT 4 UNIVERSAL
- PN 14440: DOT 5.1 UNIVERSAL
- PN 60190: DOT 4 RACING

CHAIN LUBE

400ml

FOR O-RING, X-RING &
STANDARD CHAINS

Rock Oil Chain Lube is used in competition, off road and road use. It provides excellent anti-shock and anti-wear protection and is highly resistant to fling. Chain life is also greatly extended.

PN 07080

CHAIN WAX

400ml

FOR O-RING, X-RING &
STANDARD CHAINS

Rock Oil Chain Wax is suitable for both road and off road applications and is used by some of the world's best racing teams. A well waxed chain will not only last significantly longer but will also extend the life of sprockets and reduce friction, thus increasing power.

PN 07230

SILICONE BIKE SHINE

400ml

HIGH PERFORMANCE
MAINTENANCE SPRAY

Rock Oil Silicone Bike Shine is a multi-functional spray for the protection and lubrication of motorcycle components. Specially developed to give instant and lasting protection, as well as a shine, to all motorcycle components and motorcycle related accessories. It improves and conditions fairings, engines, panels, leather and helmets. It may be sprayed on all surfaces to give a protective coating and helps keep the engine and components free from dirt. It also waterproofs vital components such as HT leads.

PN 14630

CARB KLEEN

400ml

FOR ALL FUEL
SYSTEMS

Carb Kleen is a specially formulated blend of solvents and cleaning agents designed to remove oil, grease, gum and varnish from carburettor and fuel injection systems. Its superb cleaning attributes allow for carburettor/fuel injection systems to work much more precisely, vastly increasing the engine efficiency.

PN 14640

ROCKEZE

400ml

HIGH PERFORMANCE
MAINTENANCE SPRAY

Rockeze is a light hydrocarbon solvent and has been treated with the most advanced rust and corrosion inhibitors, dewatering agent and friction modifiers. This allows Rockeze to provide superior penetrating and light anti-rust capabilities and for it to be used in limitless applications, ranging from freeing rusty bolts to protecting the finest machined part. Rockeze possesses essential speedily lubrication qualities and can be used as an engine 'damp start', removing wetness from aected areas. Preventing voltage breakdown and allowing the engine to be started.

PN 04070

BRAKE KLEEN

400ml

SPEEDY REMOVAL OF
DIRT & GREASE

Brake Kleen is a sophisticated high performance chlorine free formulation which will not harm clutch or brake friction material. It is completely safe for use over plastic and rubber seals, posing no environmental risks in either vapour or residue. Brake Kleen ensures speedy and effective removal of dirt, grease, brake fluid and lining dust from brake and clutch systems.
